THEME 2: MODERNIZE WHAT MATTERS

TaxStack Solutions

Algorithmic retirement tax planning and estate wealth preservation.

TEAM & PROJECT INTRODUCTION

Replacing Brittle Spreadsheets

An interactive, algorithmic decision engine modeling multi-decade tax liabilities.

CORE TECH STACK

- React 18 & Vite
- Custom JS Financial Engine
- Tailwind CSS & Recharts
- IBM Bob Pair-Programming

PROJECT SUMMARY: THE LEGACY PROBLEM

The Retirement Tax Cliff

Missing Inflation

Legacy calculators ignore multi-decade threshold expansion.

Lookback Flaws

Medicare's strict 2-year MAGI window overlooked.

Blunt Logic

Forcing unnecessary 35% peak tax brackets.

PROJECT SUMMARY: OUR SOLUTION

Dynamic Lifetime Tax Modeling

Dynamic Indexing

30-year bracket inflation tracking.

SECURE 2.0 Native

Linked to IRS Uniform Lifetime Table divisors.

CMS IRMAA Engine

Rolling 2-year MAGI surcharge forecasting.

PROJECT SUMMARY: STRATEGIC BREAKTHROUGH

"RMD Taming" Optimization

Capping conversions at the 24% bracket prevents tax creep without overpaying today.

ANNUAL TAXABLE RMD SAVED

$152k

Controlled multi-decade liquidation.

Key Learnings & Improvements

1

Resolving Circular Logic

Social Security taxation loops algorithmically fixed.

2

State Tax Complexity

PA 72 P.S. §7303(a)(3) mapped precisely.

3

Room for Improvement

Monte Carlo stress-testing required next.

Future Roadmap

1

Autonomous AI

watsonx.ai client strategy memos.

2

Real-Time API

Plaid brokerage holding ingestion.

3

Estate Modeling

SECURE 2.0 10-year inheritance rules.
